

**THE FUEL GAS CONSUMED FOR INJECTION IN INJECTION SEASON OF THE 2025 /2026 STORAGE CYCLE FOR PERIOD:
MAY 1, 2025 - OCTOBER 14, 2025***

Fuel gas consumption coefficient for injection season of the storage cycle 2025/2026 was $C_{FG} = 1,17\%$

Total transmitted natural gas volume what has been applied with fuel gas consumption coefficient for injection during the 2025/2026 injection season **7 562 471 554 kWh**

The actual fuel gas consumption coefficient for injection of the 2025/2026 injection season was $C_{FG} = 0.719038658\%$

1. The amount of retained fuel gas for injection season of the storage cycle 2025/2026 during the period May 1, 2025 until October 14, 2025	88 480 891	kWh
2. The actual fuel gas quantity used for injection during the 2025/2026 injection season in the period from May 1, 2025 until October 14, 2025	54 377 094	kWh
3. The amount of the fuel gas to be return to system users for the period May 1, 2025 until October 14, 2025	34 103 797	kWh

** In accordance with Rules of use of Inčukalns UGS point 55. If the amount of fuel gas consumed by the system operator to ensure the natural gas injection process is less than the quantity received from the system user during the injection season, the system operator shall return the unused fuel gas to the system user in proportion to the quantity actually injected during the injection season.*
